Flash (⚡) always fires for best pictures. Steady green light indicates flash is ready. If green light goes off and camera shuts off, lightly touch shutter button (📸) or close and reopen camera to turn flash on.

Flash-override lets you turn automatic flash off when necessary. Press (⚡) button briefly until Flash Off (🚫) icon appears. Use Flash-override when shooting through glass or when flash is not desirable or permitted. Hold camera steady or use tripod.

Minimize the "red-eye" effect in your photos. Press (⚡) button briefly until red-eye reduction (🚫) icon appears. Hold camera steady, flash is delayed for one second. Use indoors in very low light.

Be in your own picture! Place camera on flat surface or tripod. Press (⌚) button briefly to select self-timer (⌚). With self-timer selected, press shutter button (📸). The self-timer (⌚) and red light next to the lens will blink and camera will time for 12 seconds. To cancel self-timer, press (⌚) button again.
